Thanks Tim and Drew. If/when possible, we would also like to take a look at the peer review of the data, as I assume that did, or in the future will, play a role in a listing decision. Thanks.

jill

Subject: RE: EPA comments on 2012 Draft IR - request for Kenai River turbidity data

Drew,

In response to EPA comments on the 2012 IR I have created a folder containing all the raw Kenai River turbidity data collected during the 2008-2010 time period. The turbidity data can be found in the following folder on the statewide S drive:

\\\\An-svrfile\\\groups\\\Water\\\WQ\\\NPS\\\Waterbodies\\\Kenai\\\\EPA\\\submittals_2012 IR

The files in this folder contain all the raw turbidity data collected by the KWF either under contract or grant during the 2008-2010 time period. The actual raw files we received from KWF contain other WQ parameters in addition to turbidity - the other WQ parameter data were removed. No turbidity data points have been removed (contains all turbidity data including outliers).

Tim

Hi Drew,

Here are EPA's comments. Thanks so much.
